

ADVAN-WAND[®]

The smart wooden wall system!

Unlimited creativity!

Different variations are possible due to the ingenious ADVAN-WAND system. For example, with the same module that you use to put up a presentation wall, you build a counter, desk or other presentation furniture. The ADVAN-WAND offers a solutions for all your creative ideas.

Custom-made!

Finishing the ADVAN-WAND panels is possible in several ways. As for the design you never make concessions. Panels can be sprayed in all decors of melamine particle board in any RAL colors. In this way you can enjoy all the advantages of a standard exhibition presentation, but you are still assured of a highly distinctive customized solid solution.

Users agree:

Maximum flexibility!

In three simple steps to a professional trade fair presentation. Building a professional stand was never this flexible, fast and strong as before and the costs are price-technical very interesting. Where existing high-speed building systems often come short of requirements, ADVAN-WAND offers a great simple solution to all challenges of stands.

The ADVAN-WAND is not only very quick to build but also very easy to break down, store and transport. And therefore extremely suitable for re-use. The ADVAN WAND stand system not only saves a lot of money, but also time and energy. Without affecting the stability and durability of the stand.

One-time investment!

The ADVAN-WAND can adapt to any new environment.
In this way you can enjoy one investment again and again!

1

The variety of frames makes it possible to build a customized presentation wall in any shape or height. Sockets, light boxes, LCD screens and doors are easy to integrate, just like the cables which can be tucked away completely.

Distinctive and customized

2

The panels are equipped with a patented suspension system. This system makes it possible to hang the panels in the frame without the use of drills or screws.

Without drills or screws!

A stand of forty square meters can be build effortlessly within three hours. All this, with a distinctive and customized presentation wall.

The panels are also suitable for the fixing of heavy materials.
